Screen Name Redacted

mix of philosophy that has to guide your policy. What is safe, what resources are available including sanitizing and face

covering products for people who can't afford them. Help for businesses

opening, ability to report businesses not adhering to safe opening. Sharing of

information about the disease

Screen Name Redacted

Unfortunately it's the answers no one currently has yet - what are the long term health effects of COVID and when/what kind of vaccines are we looking

at (as well as what is the inoculation plan for folks who do not have access to

health care services.

Screen Name Redacted 7/08/2020 11:20 AM	How the city plans on bringing the city back online while providing PPE to the general public.

Screen Name Redacted 7/09/2020 08:57 PM	At some point can we please discuss that the stay home order is NOT a cure? It is NOT a long-term solution! The only solution is herd immunity unless a vaccine is found.

Screen Name Redacted 7/09/2020 10:29 PM	Real breakdown on data regarding new covid cases going forward

Screen Name Redacted 7/10/2020 07:30 AM	I think there should be a big push to get restaurants and businesses set up outdoors for the foreseeable. People don't feel safe I. Confined spaces.

children to wear masks.

Would like to know more about the impact on our community and also would like guidance about how best to prepare for a second wave. If there is a resurgence in the fall/winter, it could be much harder since road and weather

conditions could play a role.

Screen Name Redacted

7/15/2020 03:35 PM

A simple statement of values and a commitment to protecting all residents from sickness, poverty, and hunger (and making it easy for people to get

help).

Screen Name Redacted

7/16/2020 11:37 AN

For everyone to follow the process. It is showing that wearing a mask does help. Washing hands does help. I still see people of different ages not wearing a mask or covering. Keeping distance is also a big plus. The

crowded it is the easier to contact

biking, transit...)

I would like to see how the city is using science to prioritize its tasks around COVID-19 in a very clear cut way. We know that masks are helpful - what are we doing around that? Social distancing - what actions have we done for

that specifically? etc.
